

Solarspot accessory options

Integrated electric light kits

Why not use your Solarspot to provide electric light for night time use and remove ceiling clutter with an integrated electric light kit.

The integrated electric light kit installs into the lower section of Solarspot tube and can be wired into the electrical mains of your home so that it can be switched on when it's dark outside.

The integrated light kit can be used in conjunction with any E27 lamp; LED, Halogen or CFL.

£39.60 inc. VAT

Includes complimentary 15W CF lamp

Neoprene flashing insulator

Improve the insulation in your loft void and reduce drafts with a neoprene flashing insulator.

The neoprene insulator fits tightly around the tube on the underside of the flashing and is then fixed to the roof structure. This is particularly useful in older roofs with traditional bitumen-based felt.

£9.90 inc. VAT

Thermal wrap

Increase the thermal efficiency of your Solarspot tubular daylight system and protect against insect ingress with our foil thermal wrap.

As part of the installation of your Solarspot tubular daylight system it should be taped with the foil tape provided but its not always possible to prevent tiny clinks of light that can attract insects into the tube.

By applying a jacket of thermal wrap to your new Solarspot you will not only ensure that every clink of light is covered you will also improve the overall thermal efficiency of the unit.

If purchase our thermal foil wrap your authorised installer will apply this for you at no extra charge.

£29.95 inc. VAT

Approximate size 600mm x 7.5m
